## International Contract Prompts Relocation for IT Company

Ripon-based IT Support company InTegral IT Services has relocated to Barker Business Park at Melmerby, near Ripon following significant recent account wins including one to provide IT services for US manufacturer Constar Inc.

Jonathan Edwards, who launched the business in 2006 following almost ten years in the industry is delighted with the progress the North Yorkshire specialists are making.

“From a standing start just over 12 months ago we now have 14 contracts servicing businesses ranging from one person virtual offices to media agencies and one of the region’s largest manufacturing plants,” he said.

The company provides complete IT systems for a broad range of businesses and is a specialist in supplying and maintaining networks designed to bring the benefits of highly trained technicians to businesses that don’t need full time IT staff.

We are recruiting more trained networkers, software specialists and IT engineers to support the growing client base, and our new base at Park House will be a great base from which to expand further.”
